BIOGRAPHY

The Unfinished Story is the Connecticut based, acoustic musical project of GP. Sometimes he drags along some musical friends to play alongside him and help bring his musical creations to life, sometimes he doesn't. GP has been playing guitar for over 25 years and singing for over 15, but really only started playing shows and recording music since 2014. Taking his hobby from the garage/bedroom, and bringing it out more into the public. The music is in a singer-songwriter style, with a mix of emo, adult contemporary, and folk.

In 2024, throughout the summer and fall songs will be released on the first of every month. Starting with Always Alone on July 1st, a Nirvana cover on August 1st and "Love in a World on Fire a song inspired by watching the documentary Fire of Love will come out on September 1. A song called "My Heartache Has No Sound" is on tap for October 1st which was written after re-watching Forrest Gump and written about Forrest's mother and Jenny's passing. This song has a music video along those lines. All songs were created teaming again with amazingly talented Asher Condit (Kingship Recording in Nashville) and Austin James (Nomadic Productions in CT) and will become an EP titled Bells and Whistles at the end. Many of my vocals and guitars for this album were recorded at Pharoah Recording Studios in CT.

The previous 2022 release from The Unfinished Story titled dark skies, clear heart includes 4 songs about helping one another and even an alien invasion. dark skies, clear heart was the first album to feature more of a full sound than previous releases. This came about from working hand in hand with Asher Condit from Kingship Recording Company in Avon, CT. Asher's musical skills, production and mixing expertise helped this EP to include percussion, bass, multi-layered vocals, violins, and even a trumpet solo to boot. But the songs still don't lose the acoustic base and raw vocals from which they were

started. The lead single Aliens was created literally after watching the amazing visuals in the movie Annihilation during the pandemic. The song features amazing violin work from friend and CT musician Austin James of Austin James and the Nomads.

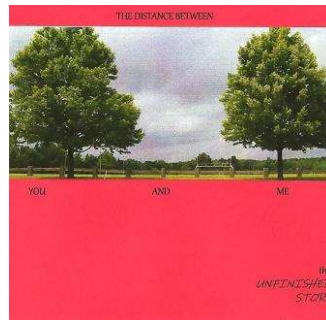

dark skies, clear heart is a follow up to 2018's The Distance Between You and Me which featured multiple songs with Kurt Baumer, from the band Lonestar, on fiddle. Including the song Long Distance Love which was played on local radio stations in CT, western Mass, and Vermont. It was recorded, mixed and mastered by Jake Subin at Telefunken Studios in South Windsor, CT.
